Team ID	
Project Name	**Medical Diagnostic Center – ServiceNow Service Portal**
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement

Medical diagnostic centers often face challenges in managing patient appointments, diagnostic test bookings, payments, reports, notifications, and access permissions through a centralized system. Manual or disconnected processes can result in appointment conflicts, incorrect test pricing, delayed notifications, difficulty accessing reports, and data-security issues.

Selected Problem

To develop a centralized Medical Diagnostic Center application using ServiceNow that enables patients to browse diagnostic tests, book appointments, manage payments, receive notifications, and access reports while providing secure role-based access for staff and administrators.

Brainstorming Discussion

The team discussed possible solutions for improving the diagnostic-center workflow:

- Online diagnostic test catalog
- Patient appointment booking
- Appointment slot management
- Automatic test-price calculation
- Payment-status management
- Patient report management
- Email notifications

- Appointment approval workflow
- Role-based access control
- Service Portal for patients and staff
- Automated validation of appointment slots

Final Selected Idea

Medical Diagnostic Center Management System using ServiceNow

Step-2: Brainstorm, Idea Listing and Grouping

You can present the brainstorming ideas in these groups:

🏥 **Patient Services**

- Patient registration
- Diagnostic test catalog
- Online appointment booking
- Appointment cancellation
- View appointment status
- View laboratory reports

📅 **Appointment Management**

- Slot availability
- Duplicate booking prevention
- Overlapping appointment validation
- Appointment approval
- Scheduled-date validation
- Appointment status tracking

💳 **Payment Management**

- Automatic test-price population
- Payment status tracking
- Payment confirmation
- Refund management

📧 Communication

- Appointment confirmation email
- Approval/rejection notification
- Payment confirmation
- Report-ready notification
- Cancellation notification

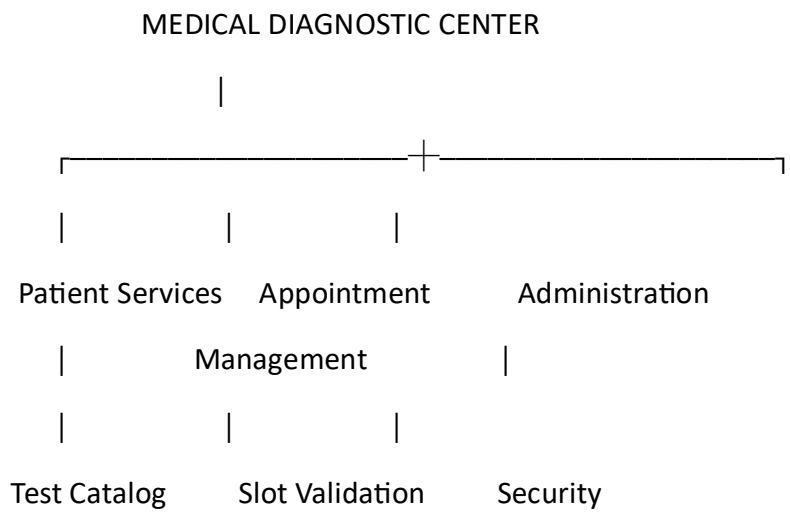

🔐 Security & Administration

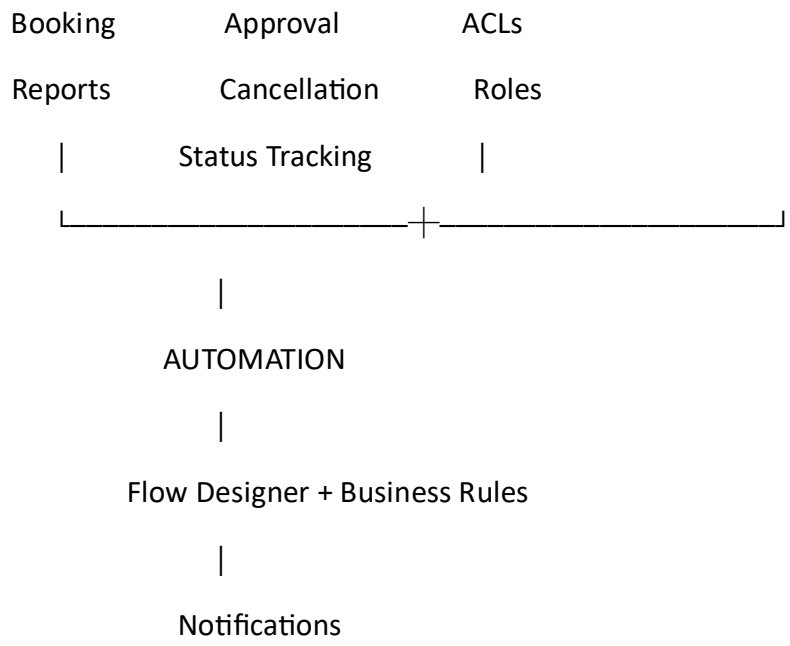

- Role-based access
- Patient data protection
- ACL configuration
- Admin management
- Staff access control
- Secure report access

⚙️ Automation

- Flow Designer workflows
- Business Rules
- Automatic data population
- Automated notifications
- Real-time slot validation

Final Grouped Concept

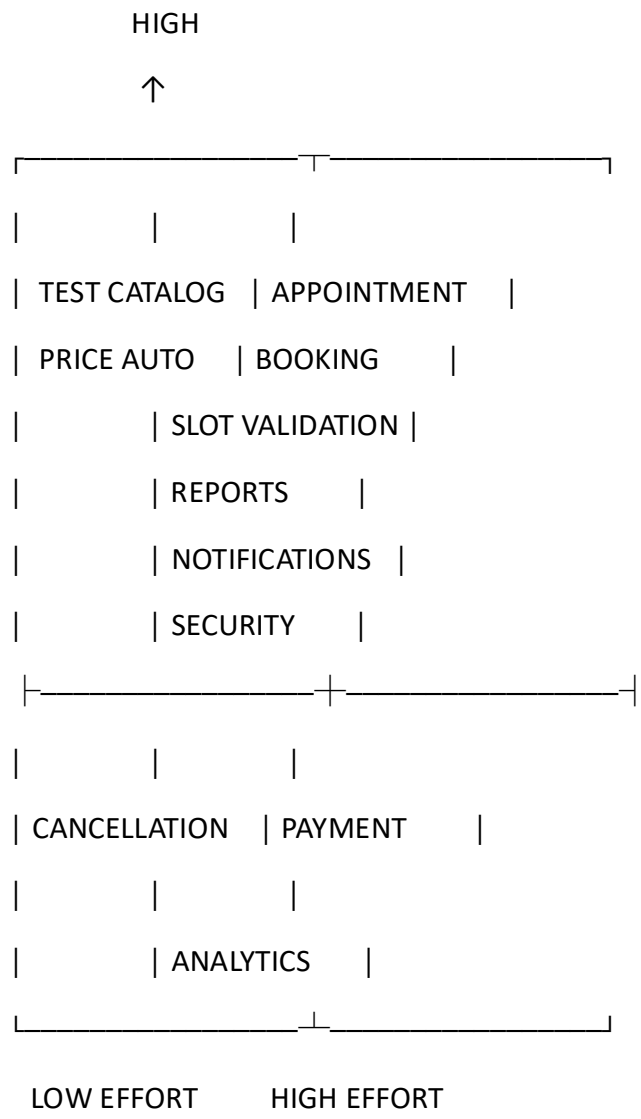

Step-3: Idea Prioritization

For the prioritization diagram, use **Impact vs. Effort**.

Idea	Impact	Effort	Priority
Online Appointment Booking	High	Medium	☆ High
Diagnostic Test Catalog	High	Low	☆ High
Appointment Slot Validation	High	Medium	☆ High
Patient Report Management	High	Medium	☆ High
Automated Notifications	High	Medium	☆ High
Role-Based Security	High	Medium	☆ High
Payment Status Management	Medium	Medium	Medium
Appointment Cancellation	Medium	Low	Medium
Automatic Test Price Population	Medium	Low	Medium
Advanced Analytics	Medium	High	Low

Prioritization Diagram

IMPACT

Final Prioritized Solution

Based on **business impact, feasibility, and implementation effort**, the team prioritized:

1. **Diagnostic Test Catalog**
2. **Online Appointment Booking**
3. **Appointment Slot Validation**
4. **Patient Report Management**
5. **Automated Notifications**
6. **Role-Based Access Control**
7. **Payment Management**
