Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date **13 September 2026**

Team ID

Project Name **Medical Diagnostic Center – ServiceNow**

Maximum Marks **4 Marks**

Functional Requirements

Following are the functional requirements of the proposed **Medical Diagnostic Center** solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	**User Access & Authentication**	Patient login through ServiceNow portal Secure access to patient dashboard
FR-2	**Diagnostic Test Management**	View available diagnostic tests View test name, category, description and price Select required diagnostic test
FR-3	**Appointment Booking**	Enter patient details Select appointment date Select available time slot Create appointment
FR-4	**Payment Management**	Display test amount Process payment Update payment status Display payment confirmation
FR-5	**Appointment Management**	View booked appointments Track appointment status Approve/reject appointments Cancel eligible appointments
FR-6	**Notification & Confirmation**	Send booking confirmation Send appointment status notifications Provide appointment/confirmation details

FR-7	**Laboratory Report Management**	Generate laboratory report after test completion Store report findings Associate report with patient and appointment
FR-8	**Report Verification**	Allow authorized staff/doctor to verify reports Store verified-by information Update report status
FR-9	**Patient Report Access**	View available laboratory reports View report details and findings View test date and report date Access report from the Service Portal
FR-10	**Administrator Management**	Manage diagnostic tests Manage appointments Manage patient information Manage laboratory reports

---

Non-functional Requirements

Following are the non-functional requirements of the proposed **Medical Diagnostic Center** solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The application should provide a simple, clear and user-friendly Service Portal interface so that patients can easily browse tests, book appointments, make payments and view reports.
NFR-2	**Security**	Patient and medical information should be protected through authenticated access and appropriate ServiceNow access controls. Users should only access information relevant to their role.
NFR-3	**Reliability**	The system should reliably store patient, appointment, payment and laboratory report information without data loss or incorrect associations.

NFR-4	**Performance**	Portal pages, test information, appointments and laboratory reports should load within a reasonable time and system operations should respond efficiently.
NFR-5	**Availability**	The application should be available to authorized users whenever diagnostic services are required, subject to ServiceNow platform availability.
NFR-6	**Scalability**	The solution should support an increasing number of patients, diagnostic tests, appointments and laboratory reports without major changes to the application design.
NFR-7	**Maintainability**	The application should be modular and easy for administrators or developers to maintain, update and enhance.
NFR-8	**Data Integrity**	Patient, appointment and report information should remain accurate and correctly linked throughout the diagnostic workflow.
NFR-9	**Compatibility**	The Service Portal should work properly on commonly used desktop and mobile web browsers.
NFR-10	**Auditability**	Important appointment, report and administrative changes should be traceable through ServiceNow records and system information.
